SUMMARY

Software Engineer with 6 months of production internship experience in MERN stack development, RESTful APIs, JWT authentication, role-based access control, and Docker containerization. Delivered production-ready POS and inventory systems for real-world operations while collaborating with clients and Agile teams. Skilled in frontend and backend development, problem-solving, and writing maintainable, scalable code.

SKILLS

Frontend: React.js, Tailwind CSS, Bootstrap, Mantine UI

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

APIs & Authentication: RESTful APIs, JWT, Role-Based Access Control

DevOps & Tools: Docker, Git, GitHub, Postman, VS Code, Figma

Methodologies: Agile, Kanban, MVC Architecture

EXPERIENCE

Software Engineering Intern - Servand Pvt Ltd | Jun 2025 – Jan 2025

- Developed responsive React.js UI components, improving usability and cross-device performance.
- Built and tested RESTful API endpoints, ensuring reliable backend communication and accurate data handling.
- Debugged frontend and backend logic issues, reducing production bugs by 20%.
- Designed UI wireframes and feature workflows using Figma to support new feature development.
- Collaborated with developers in an Agile/Kanban environment, delivering sprint tasks on time.
- Communicated with clients to gather requirements, clarify expectations, and explain implemented functionality.
- Containerized applications using Docker, ensuring consistent development and deployment environments.

PROJECTS

POS System for Hotel | MERN Stack, JWT, Tailwind CSS, Docker

- Developed a production-ready POS system for real hotel operations, handling 200+ daily transactions.
- Implemented order management, billing, sales reporting, and role-based access control for Admin and Staff users.
- Integrated secure JWT authentication and authorization to protect sensitive business data.
- Containerized the system using Docker, ensuring consistent development and deployment environments.
- Collaborated with clients to gather requirements and iterate features, delivering a fully functional system for daily operations.

Smart Inventory & Supply Chain Management | MERN Stack, Docker

- Developed inventory lifecycle management features including stock tracking and supplier management.
- Implemented MVC architecture to improve code maintainability and scalability.
- Added analytics dashboards for inventory insights and reporting.
- Implemented automated low-stock alerts to prevent shortages.
- Used Docker to containerize the application for consistent development environments.

EDUCATION

Higher National Diploma in Information Technology (HNDIT) – Sri Lanka Institute of Advanced Technological Education (SLIATE) | Jun 2023 – Jul 2025

CERTIFICATIONS

- Enterprise Software Development Kit (Completed 2024)
- JavaScript Bootcamp (Completed 2024)
- Web Design for Beginners (Completed 2024)
- Docker for Beginners (Completed 2025)
- API Beginners Learning Path (Completed 2025)

ACHIEVEMENTS

- 2nd Place - SLIATE & ATI Website Development Competition

VOLUNTEER EXPERIENCE

Event Management Committee President – ATI Trincomalee | Jan 2025 – May 2025

- Led Silver Jubilee celebrations, organizing 25+ community-focused events.
- Coordinated teams, managed timelines, and ensured successful execution of large-scale programs.
- Developed leadership, communication, and organizational skills through committee management.
