SUMMARY

Software Engineer with 6+ months of production internship experience building and supporting client-used web applications. Hands-on experience in MERN stack development, RESTful APIs, JWT authentication, and role-based access control. Delivered a production POS system for real hotel operations while collaborating directly with clients and Agile teams.

SKILLS

Frontend: React.js, Blade Templating Engine, Tailwind CSS, Bootstrap, Mantine UI

Backend: Node.js, Express.js, Laravel

Databases: MongoDB, MySQL

APIs: RESTful APIs, Authentication & Authorization, JWT

Tools: Git, GitHub, Postman, Docker, Figma, VS Code

Methodologies: Agile, Kanban, MVC Architecture

EXPERIENCE

Software Engineering Intern - Servand Pvt Ltd

15/06/2025 – 15/12/2025 (6 Months)

- Developed and enhanced responsive React.js UI components, improving usability, performance, and cross-device compatibility.
- Built, tested, and validated RESTful API endpoints using Postman, ensuring accurate data handling and reliable backend communication.
- Debugged and resolved frontend and backend logic issues, reducing production bugs and improving overall application stability.
- Designed UI wireframes and feature workflows using Figma to support new feature development and user experience improvements.
- Collaborated with developers using Kanban boards within an Agile environment to track tasks and meet sprint goals.
- Communicated directly with clients to gather requirements, clarify expectations, and explain implemented system functionality.

PROJECTS

POS System for Hotel (Client Project)

Tech Stack: MERN Stack, JWT, Tailwind CSS

- Designed and developed a production-ready POS system for real hotel operations, delivered directly to a client.
- Implemented order management, billing, sales reporting, and role-based access control for Admin and Staff users.
- Integrated secure JWT-based authentication and authorization to protect sensitive business data.
- Worked directly with the client to gather requirements, iterate on features, and deliver a system suitable for daily operational use.

Community-Based Service Provider System

Tech Stack: Laravel, Blade Templating Engine, Tailwind CSS, MySQL

- Implemented admin-controlled approval workflow to verify and approve service provider profiles before they become publicly bookable.
- Developed a role-based access system for Admin, Service Provider, and User roles using Laravel authentication and middleware.
- Built user service booking functionality with booking history tracking for improved user experience.
- Designed and implemented responsive UI components using Blade templating and Tailwind CSS.

Smart Inventory & Supply Chain Management (Ongoing)

Tech Stack: MERN

- Developed inventory lifecycle management features including stock tracking and supplier management.
- Implemented MVC architecture to improve code maintainability, scalability, and separation of concerns.
- Added analytics dashboards for inventory insights and reporting.
- Implemented automated low-stock alerts to help prevent inventory shortages.

EDUCATION

Sri Lanka Institute of Advanced Technological Education (SLIATE)
Higher National Diploma in Information Technology (HNDIT)

06/2023 – 07/2025

ACHIEVEMENTS

- 2nd Place SLIATE & ATI Website Development Competition

CERTIFICATIONS

- Enterprise Software Development Kit
- JavaScript Bootcamp
- Web Design for Beginners
- Docker for Beginners
- API Beginners Learning Path

VOLUNTEER EXPERIENCE

Event Management Committee President – ATI Trincomalee

01/2025 – 05/2025

- Led and managed Silver Jubilee celebrations, organizing 25+ community-focused events.
- Coordinated teams, managed timelines, and ensured successful execution of large-scale programs.
- Developed leadership, communication, and organizational skills through committee management.
